

For Lubron's customers service begins from the very first contact. Whether it is an enquiry about new equipment or about an existing installation, we first assess the role of the equipment and the customer's expectations, then we respond positively and responsibly.

Our methodology is based on the provision of the highest standards of customer service in the industry, striving to deliver 'best performance' from every piece of equipment, and ensuring our customer's peace of mind.

We take great pride in our work - many of our installations being specifically designed for particular applications with

follow-up maintenance projects relying on equally meticulous and skilful engineering. Our constant focus is simply quality and care.

Sometimes, we maintain other manufacturers' equipment along with our own. We do not mind, as all projects are treated in a similar manner. Our aim is to have a satisfied customer base, like the important organisations listed below who all benefit from our consistent attention to detail.

Without being complacent, we know that we have a reputation in the industry for the quality of our customer service and delivering and exceeding expectations. If you would like to have peace of mind, take advantage of our dedication by calling our Service Department today on 01206 866444 or email: [service@lubron.co.uk](mailto:service@lubron.co.uk)
