

SOLUTIONS Service Capability

SOLUTIONS

Decades of experience and an innovative approach, means that we design and implement the most cost-effective and technically efficient solution tailored to your water treatment needs, whilst minimising environmental impact. We also ensure that all legislative and regulatory requirements are met.

For Lubron's customers quality service begins with the very first contact. Whether it is an enquiry about a new application or an existing installation we first assess the customer's expectations and then the process needs, before responding positively and responsibly. We operate with the highest integrity throughout.

Good service relies on extensive expertise and many years experience, backed by a conscientious resolve to find out our customers' requirements. Our highly qualified personnel and dedicated support staff treat all customers with equal care

commitment so that customers believe that working with Lubron is a win, win situation and will be happy to remain with us for a long time.

We take great pride in our work and we are determined to maintain our reputation for quality service that exceeds our customers' expectations.

If you have water treatment issues in any of the areas listed overleaf and would like to have peace of mind, take advantage of our dedication by calling us to discuss your requirements.

STEAM BOILERS

- Feed System protection
- Corrosion and Scale control
- Condensate protection
- Adjuncts
- Zero solids and food grade products
- Dosage and Control equipment
- Energy Reduction strategies
- On Site testing, analysis and reporting

COOLING TOWERS

- Oxidising and Non Oxidising Biocides
- Legionella Specific Biocides
- Corrosion and Scale Inhibitors
- Dispersants
- Dosage and Control equipment
- Cleaning and Disinfection services
- On Site testing, analysis and reporting

HEATING AND COOLING CIRCUITS

- Scale and Corosion Inhibitors
- Biocides
- Filtration
- Dosage and Control equipment

LEGIONELLA MANAGEMENT

- Complete management for all types of systems
- Legionella Risk sssessment
- Legionella Risk management
- Cleaning and Disinfection services
- Monitoring and Record systems
- Microbial sampling

DOMESTIC AND PROCESS WATER

- Chlorine Dioxide
- Biocides and Inhibitors

EFFLUENT

Chemical and Mechanical purification systems for cost reduction and consent compliance

PLANT AND EQUIPMENT

- Water Softeners
- Reverse Osmosis
- Water Filters
- Water Purification equipment
- Dosage and Control equipment

PROCESS WATER

Scale and Corrosion inhibition, dispersants, antifoams, anti-wetting agents, microbial control etc

TRAINING AND CONSULTANCY

Training and Consultancy packages in all areas listed.
