

HOSPITALITY

LUBRON

WATER TECHNOLOGIES

Clean, high quality water is essential to the hospitality and catering sector. Additionally, water composition has a direct impact on the service life of equipment, insufficiently treated water can cause a multitude of issues.

Water plays a pivotal role in the hospitality industry. Its quality affects the flavour of the food and drink you serve, the cleanliness of your premises, fixtures and fittings, the health of your customers, the lifespan of equipment, and ultimately the reputation of your company. Let Lubron help you to mitigate risk of Legionella and other pathogens, maintain compliance, reduce operating costs and maximise profitability.

HOSPITALITY

Through purified and soft water provision, Lubron helps the hotel and catering industry achieve improved food and beverage quality plus remarkable results for ware washing and laundry. Treated water not only guarantees hygiene but tastes better. It also prevents serious and expensive damage to equipment and saves money on energy and chemicals.

POLISH-FREE CLEANING SOLUTION

Polishing is not only time consuming and unhygienic, but also often leads to damage or breakage. By using the reverse osmosis process, Lubron provides solutions with high quality results. In order to determine whether a polish-free water solution can be applied, both the dishwasher and rinse water have to be tested.

REDUCE MAINTENANCE COSTS, INCREASE PROFITS

By using softened water in kitchen equipment, scale deposits are minimised and maintenance costs are kept low. Through installing Lubron products, potential equipment malfunctions are significantly reduced, providing reassurance for you and your business.

MICROBIOLOGICAL CONTROL INCLUDING LEGIONELLA

Our products, consultancy services, accredited courses, chemical water treatments, and the latest technology, including UV-disinfection and reverse osmosis, ensure a safe and healthy environment with optimal equipment and system reliability.

COOLING TOWER TREATMENT

POLISH FREE WASHING SOLUTION

LESS CLEANING WORK

LEGIONELLA/WATER HYGIENE CONTROL

CONTINUOUS DISINFECTION SYSTEMS

REDUCED ENERGY CONSUMPTION

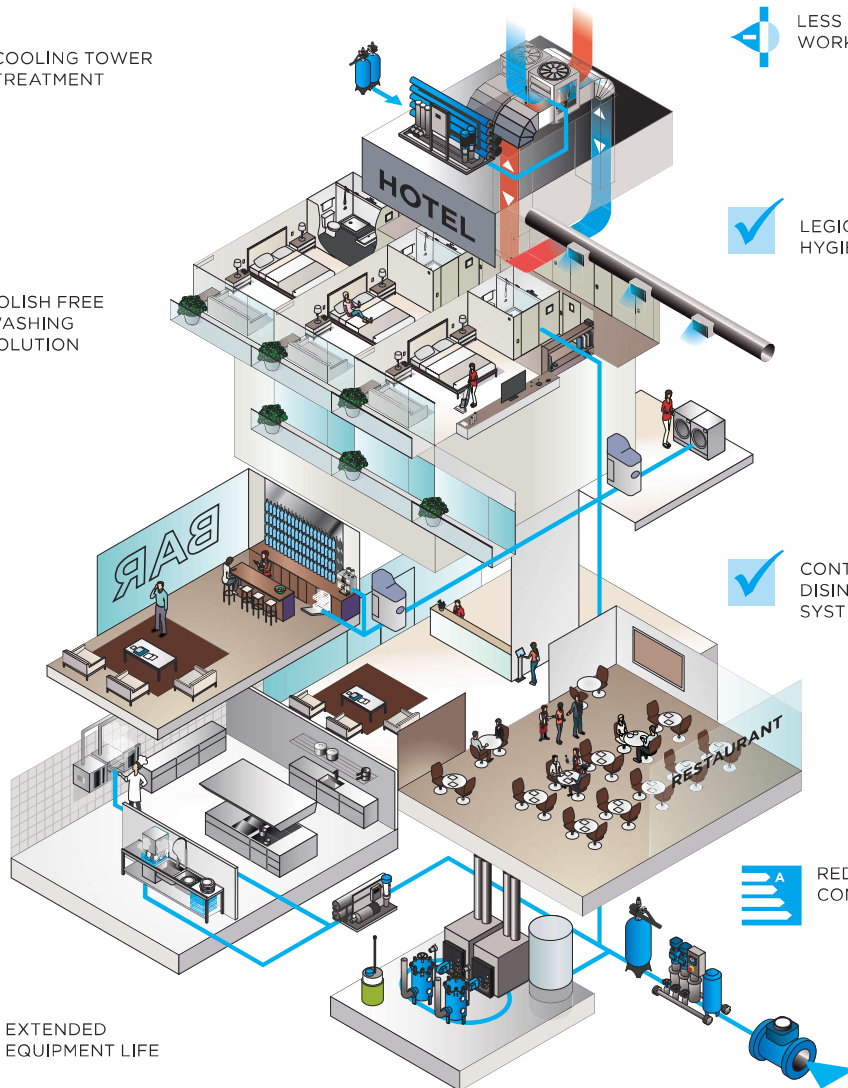

EXTENDED EQUIPMENT LIFE

INCREASED PRODUCTIVITY

BOILER TREATMENT

LESS CLEANING

The high standards of cleaning demanded throughout the industry, require the removal of scale from tiles and taps in bathrooms, toilets and kitchens. By using decalcified water, scale deposits can be reduced significantly, resulting in both time and cost savings. Whatever the size of your business, big or small, Lubron provides the best water treatment solution.
