

5 Years Extended Warranty

With our 5 year Service Package

IT IS IMPORTANT TO INVEST IN THE RIGHT EQUIPMENT TO SAVE ON EXPENSIVE REPAIRS IN THE FUTURE.

Lubron are so confident in the equipment we supply; we now offer an industry first 5-year warranty on all new Reverse Osmosis and pre-treatment plant. This will cover parts and labour.

Of course, the plant needs to be looked after, so all we ask is for you to take out one of our service packages. This ensures the essential maintenance can be carried out by an experienced Lubron engineer, to keep your plant running like the day it was commissioned.

We will guarantee all working parts, excluding consumable filters, media and membranes. However, we use low pressure membranes on our RO units and protect them from scale and chlorine with the correct pre-treatment, so they last longer than the high-pressure versions. This ensures longevity and performance.

CARE PACKAGES

At Lubron our customers have different water treatment applications, and for each application the service requirements differ. That's why we have tailored service packages and additional services to meet all our customers' requirements.
